Quick Lesson on Flying Star Monthly Stars

Lots of people want to know how I write the monthly flying star charts, which are attached here for you. There are some simple concepts to understanding this. I've tried to boil this down as simply as possible so you can see the patterns of the energies – once you understand the pattern, you can write calendars yourself, help your clients or just understand how the monthly energies move and change.

Each year, the feng shui flying star changes on February 4.

Notice how the energies shift from January to February from 2014 to 2015, and going down by a factor of one each year thereafter.

ANNUAL ENERGIES*

January 2014	February 2015	February 2016	February 2017
SE	3	2	1
South	8	7	6
SW	1	9	8
West	6	5	4
NW	5	4	3
North	9	8	7
Northeast	7	6	5
East	2	1	9
Center	4	3	2

*Read your MCC Numbers Study Guide on how to interpret the numbers

These are the “annual stars” that will rule the various directions for the year from February to February.

This is how you can look forwards and backwards and see how energies have affected a home and the people who live there.

MONTHLY ENERGIES

The “monthly stars” are like the annual stars except that the annual stars move just once a year. The monthly stars continue moving backwards from month to month. The monthly stars are the second number in the monthly calendars i.e., 3/5 or 2/4. See blue boxes below.

Notice that the only time the **annual star changes is in February**. It stays the same all year because it is the “annual” star.

However, the second number changes every month, going backward by a factor of one. This is true for all the sectors of west, southwest, northwest, north, northeast, etc.

Example:

Now you can look at the calendar below and have an understanding of how the stars move and change from month to month because now you can see the pattern of movement.

To understand the qualities, be sure to read your numbers guide and this will help you to understand how the two energies fit together.

Numbers RECAP -- Positives & Negatives

Auspicious Numbers -- Bring success, prosperity, happiness, love

1, 4, 6, 8, 9*

Misfortune Numbers -- Bring illness, loss, accidents, separations, legal problems

2, 3, 5, 7, 9*

*Mutable number. Can be positive or negative depending on the number it's paired with.

Below are some of the combinations you'll see in the calendar that follows.

Read the descriptions in the calendar to understand how these two numbers then relate to each sector. A double 2 can create eye problems, for example, if it were in the south (rules heart and eyes). In the north, it could create problems with the career, ears or kidneys.

Difficult combinations: 2/3 (arguments), 5/9 2/9 5/2 (serious illness money problems), 7/9 injuries arguments, 2/7, 5/7 fighting injuries, 3/5 harm to legs or feet.

Beneficial combinations: 1/6, 1/8, 1/4 – money, windfalls, opportunity. Any combinations of 1, 4, 6, 8. The number 9 can also be beneficial when it's with a positive number.

Monthly Dates

So when exactly each month do the dates change? They change each month on the same dates from year to year. That means that in March 2015, the monthly flying star changes on March 6 and goes until April 4. Then April 5 to May 5....every year, year in and year out.

Save this calendar so you can see how the energies. There is a blank calendar for you to use to fill out your own flying star calendar at the end.

Why don't you give it a try?

Be sure to note doubles months – and see if you can find what VERY interesting occurrence will happen next February 2016 by filling out the chart for that month. ☺
